

Call to EUROPA

classify Revolutionary Guards of the Mullah regime in Iran as a terrorist group

According to Iran's Islamic constitution, the Revolutionary Guard (RG) is committed to protecting the Islamic revolution and exporting it to the world. Over the last 40 years, the RG has revealed its true core as a criminal terrorist organization through terrorism abroad and the establishment of militias such as Hezbollah and drug trafficking in Europe and South America ¹.

We ask governments in Europe to express their support for the following just requests from their colleagues in Iran:

- The release of all political prisoners in Iran
- The release of environmental activists detained for months
- The release of all detained workers
- The Revolutionary Guards and their suppression of machinery should be classified as a terrorist organization
- Any cooperation with the terror regime in Iran should be discontinued
- All since the 12.04.2019 brought by the mullah regime in the country, Islamic mercenaries and Occupiers from neighboring countries must leave the country immediately. These Islamic mercenaries are tasked with defeating the Mullah regime support Iranian people.

These measures are a great support for the liberation struggle of the oppressed Iranian people, as well as the workers and women's movement under the Islamic dictatorship of the mullah regime in Iran.

This fight has been going on for several decades without being noticed by the European media. Economic interests are probably more important to European governments than human rights.

Here, European governments are urged to help citizens in Iran to one day live in democratic conditions and under equality and freedom.
